Dear (name),

I have just read a book, *Forever Free From Chronic Pain*, that I believe is a must read. In his book, Prof/Dr Brian A. Rothbart talks about the fact that chronic muscle and joint pain is affecting millions of people worldwide and that billions are spent on drugs and treatments that simply are not working. Sound familiar?

But even more important than reading the facts and figures, I learned that after many years of research, Prof/Dr Rothbart discovered a previously unknown source of chronic musculoskeletal pain. Having found this source, he was able to develop a therapy which eliminates chronic musculoskeletal pain permanently without drugs or surgery.

Given the number of years I've known people to struggle to find treatment for their pain that really works, I was a little skeptical at first. But as I continued reading, I found that not only is Prof/Dr Rothbart highly credentialed, but his breakthrough therapy is receiving wide acclaim from patients and professionals throughout the world for effectively eliminating debilitating pain after all other therapies have failed.

Sound interesting? I think so, too. And because you are my friend and you have been struggling with your pain problem for many years, I thought I'd share this book discovery with you.

Dear (name),

I know that you, a medical professional, look for new and better ways to help your patients resolve their chronic musculoskeletal pain problems. Recently, I came across a book that might be of interest to you.

This book, *Forever Free From Chronic Pain*, describes a treatment to eliminate chronic muscle and joint pain permanently without the use of drugs or surgery. The author, after 40 years of treating patients and research, discovered a previously unknown foot structure that he found to be a common cause of chronic muscle and joint pain. Using this discovery he was able to develop a therapy which he has used to help free thousands of people from their chronic musculoskeletal pain around the world.

The author, Prof/Dr Brian A. Rothbart, is not only highly credentialed and heavily published, but his breakthrough therapy is receiving wide acclaim from patients and professionals worldwide for effectively eliminating debilitating pain after all other therapies have failed.

I think what you would find most useful and also prove of value to your patients is a simple test that Professor Rothbart describes to determine the likelihood of your patient having the foot structure that predisposes them to developing chronic musculoskeletal pain.
